GoSafe's Customization Center | La Porte, TX

On-Site Customization Available for Thousands of Items

Customizing your industrial apparel and equipment means items are easier to track, personnel are easier to identify, and greater compliance with programs that require job or locations-specific gear. **GoSafe's** Customization unit in La Porte, TX is equipped to produce the high quality logo-accurate items in the quantities you need when **YOU** need them.

Garment Customization | Embroidery

Embroidery is one of the first enhancements most customers look at when considering decoration of apparel. A logo announces to the world who you represent and makes a strong first impression which can make a big difference in business. goSafe can handle all aspects of your embroidery needs. We offer a wide selection of thread colors constructed of either 100% polyester (our default thread choice) or 100% rayon, which is available upon request through your Customer Service Representative or the embroidery department. Both selections ensure color vibrancy as well as colorfastness, though we do not recommend rayon thread for industrial laundered product. Read on to see some of the options available within the world of embroidery.

How to Request a Custom Logo

- **Contact Customer Service** for additional information on submitting new logo image artwork.
- **Formats** - Preferred format is vector-based art. Typically .AI, .SVG, and .EPS files. Other acceptable formats for artwork include .PNG, .TIF, .BMP, and .JPG, though these may need to be vectorized and may be subject to an additional fee.
- **Color / Thread Limitations** - Custom logos are limited to 9 colors.
- **Size** - A typical left or right chest location is about 2 ½" x 3 ½". Small details in a logo design may require resizing or an adjustment so that detail can be seen. See following pages for size guidelines on garments and locations.
- **Digitizing Fees** - 1 to 8,000 stitches - **\$95.00***. 8,001 stitches and up - **\$125.00***
- **Color Changes** - There is a **\$25.00*** fee for changing colors to an existing logo if a new logo number is required.
- **Revisions** - Charges for revisions are determined based upon complexity. There may be up to a **\$50.00*** fee for customer requested revisions.
- **Timeline** - Please allow up to 3 days to receive a sew-off of custom logos. Logos in excess of 20,000 stitches may require longer.

* Please Note : Prices are subject to change without notice.

Embroidery Guidelines & Success Tips

- Placement and size can differ based on the garment they will be sewn on. These pages show placements and size guidelines for various garment types.
- Embroidering on a garment with textures, prints, or patterns can often make part of a logo difficult to see. Ask for a sew-off prior to placing orders to be certain that all words are legible and colors are visible.
- To determine the best size and placement for embroidery, photocopy the logo to the desired size, cut it out and place it on the garment in various locations until the best size and location is determined.
- If grommets, eyelets, or badges will be going on the same side of a garment as embroidery, be sure to leave the appropriate space for the badge when specifying embroidery location.
- Embroidery requested on a pocket will render the pocket non-functional.

Embroidery Codes with Size Guidelines		
All Sizes Below Listed as Inches		
CMB	Center Middle Back	10X10
RSS	Right Sleeve at Shoulder	4X4
RUF	Right Upper Front	4X4

GoSafe uses colorfast embroidery threads for all embroidery applications. These threads are acceptable for Industrial and Homewash Processing. We are equipped to embroider garments, Oilfield bags, promotional items, and a variety of other items.

If you have questions, please do not hesitate to contact our customer service team at **800.330.9240**.

Direct Embroidery

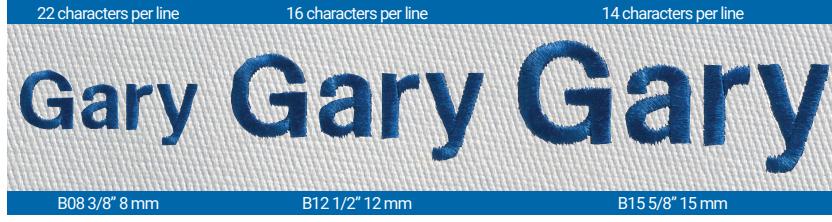

Four fonts are offered for direct embroidery with several sizes in each (3/8"- 1"). We can embroider text directly on a garment, an emblem, or on a name strip. This option is most often used for names, titles, accredits, and more, and can be done easily without the need for digitization.

- Multiple lines of type, in the same or different sizes, can easily be added to a garment. To add more than one line, please contact a Customer Service Representative at **1.800.330.9240**.
- Please specify if all CAPS are required. Using all caps will reduce the number of characters per line. The characters listed below are based on lower case.
- Include spaces and punctuation when counting characters per line.
- Collar tip and cuff embroidery locations require 8mm font and are limited to 3 characters
- All fonts also available in 10mm (not shown). Call for more information.

Emblem Embroidery

The same font selections and sizes shown on the previous page can also be applied to emblems. We offer a wide selection of emblem background and border combinations to complement whatever the garment color or pattern may be.

Emblems are a great choice for striped or patterned shirts where direct embroideries can often blend in. Another benefit of selecting to embroider on emblems is the flexibility they provide for removal should an employee's position or name change.

Stock Emblems

The possibilities are endless! Whether you choose from one of the emblems displayed here or supply us with your own emblems, our sewing operators can apply almost any shape emblem to your garments at time of order. There is no charge to store your emblems at our warehouse.

Emblems are kept in a secured area and are applied at time of order, giving you the flexibility to decorate garments with different combinations and placements of emblems. We can also assist you with the development and procurement of new emblems. Lead time for custom emblems is 6 to 8 weeks.

Embroidery Thread Options

Madeira PolyNeon

Due to their superior quality and color fastness, Madeira rayon embroidery threads can be washed at 203°F with heavy duty detergents. (Use only those which contain no bleaching agents, peroxide, or optical brighteners as discoloration may result.)

While every attempt is made to reproduce thread colors accurately, colors on your monitor or printout may not precisely match actual thread colors.

Fire Fighter 100% Aramid (Contains NOMEX® branded fibers from DuPont®).

Madeira's fire resistant thread is made from 100% Aramid, which contains NOMEX® branded fibers from Dupont®. Fire Fighter was developed for aeronautics, fire and safety, motor sports, and other areas where safety standards are specified.

Washing Instructions:

Never leave damp embroidered items folded or pressed together. Do not tumble dry unless the item has been thoroughly rinsed.

Reflective Striping

Enhanced visibility can be critical when working in high-traffic areas, construction sites, or around equipment operation. Adding reflective striping to your uniform can make a lifesaving difference.

Select from the many trim widths, colors, and placements to make your enhancements have the highest impact. These distinctive stripings can be added to most garments. Flame-resistant striping is also available. The garments and striping you select should depend on the end use requirements.

The following front and back images on page 15 indicate all single reflective stripe locations for most products. With a few exceptions, stripes shown above the waist can be applied to a shirt, jacket or coverall. Stripes shown below the waist can apply to a pant, short, or coverall. The specific details of a garment, like the size of a pocket, the placement of closures, an emblem, or an additional pocket, may dictate a slight change in the placement from what is shown in these images.

- Striping applied post-manufacturing will always go around a pocket or emblem. Pockets cannot be removed for reflective trim application.
- Stripes on a waistband will be moved up or down if the waistband has elastic sections.

Reflective Tape Options

There are several color options and widths of reflective trims that can be selected for attachment to your garments. Prices will vary depending on the trim and locations selected. Please be sure to select the correct trim.

Codes under each trim indicate the following:

- 1) Activity code
- 2) Style number or component code
- 3) Width of the trim

Suggested Placements:

For suggestions regarding reflective trim placement, including for package stripe placement where several stripes are combined on one garment, see next page.

NOTE : goSafe does not apply reflective tape to Insulated garments such as parkas, jackets, coats, Insulated Coveralls, etc.

We can also apply Brim Guards to hard hats for recognition purposes.

Screen Printing Services

Screen Printing is a quick, easy, and inexpensive way to add custom artwork and logos to different types of apparel. goSafe produces high quality artwork on items such as T-shirts, rainwear, safety vests, and even promotional items. Contact us at **800.330.9240** for additional information.

- Minimum order quantity of 24.
- Available for front and back printing (some styles).
- Prints up to five (5) colors
- Camera ready artwork required.
- Not available for all styles. Please contact a goSafe sales representative for details.

**Note: The Logo Department will make final determination on the number of logo colors used after receiving vector art files. logo files must be .ai, .eps, .svg, or other vector file type. If no vector files are available, we can use non-vector files such as .BMP, .PNG, .JPG, or .TIF files, though an additional \$50 logo set-up fee may apply, which may also delay the order. Must also receive PMS colors if exact color match is required for an additional \$35 fee. Otherwise colors will be matched as close as possible. A digital proof will be provided so that the customer can sign off and approve the artwork before orders are processed and started.*

Camera Ready Artwork must be supplied. If artwork has to be recreated additional charges apply. The definition of camera ready artwork is black art on white background. The images/letters must be clear and must be the exact representation of the desired logo. For multi-color logos, artwork must have individual color separations with registration marks. Photocopies, business cards, decals, faxes, etc. are not considered Camera Ready.

**** For vests, a 300 dpi JPG closer to the final imprinting size is preferable.**
